

The background of the image is an aerial view of a maze-like structure made of concrete blocks. The blocks are arranged in a grid pattern, creating a series of interconnected paths and dead ends. The concrete has a textured, slightly weathered appearance. A semi-transparent blue overlay covers the top-left portion of the image, where the text is located. The overall color palette is dominated by the grey and blue tones of the concrete and the overlay.

Risk Management  
Fundamentals  
(RMF) Course

# Risk Management Fundamentals (RMF)

Designed to equip you with the essential skills and knowledge required to navigate the complex world of risk management.

All activities of an organisation involve taking risks, and all employees have a role to play in managing risk effectively. We are proud to launch the new Risk Management Fundamentals (RMF) course, designed for those who have just entered the risk management profession or those in different professions who would like to know more about risk and managing risk as part of their roles.

## What does it involve?

Delivered by leading risk professionals across two days, delegates experience six interactive two-hour modules, supported by additional resources including a comprehensive course workbook, Masterclass case study, best practice templates, and recommended further reading.

Learning is assessed and reinforced through a 60 minute online exam.

## Modules

Module One	The Evolution, Language, and Business Rationale for Managing Risk
Module Two	The What and the Why of Managing Risk
Module Three	The Risk Management Framework
Module Four	The Risk Management Process
Module Five	The Relationship between Risk Management, Governance, Assurance, and ESG
Module Six	Risk in Today's World, Tomorrow's World, and the Real World

## Course Learning Objectives

Delegates will be able to demonstrate how risk management can be used to help inform decisions in support of their organisation's objectives and strategy through:

- providing awareness and knowledge about risk and how it is managed
- navigating the universe of risk as someone who is new to risk and how it is managed
- appreciating the need to collaborate internally and externally when managing risk
- describing the concept of emerging risks and other developing risk practices with examples
- applying risk management principles relevant to their organisation

## Outcomes

On successful completion of the RMF course and online exam, delegates receive a Certificate of Completion and digital badge.

Up to 12 CPD hours available.
